We will custom design and maintain your website for just \$59 a month.\*

### » Take the hassle out of running your website and let MCS update and manage your site for you.

The objective of our Managed Web Services is to ensure regular updates to your site, promote the site effectively, and manage your domain and hosting facilities, thereby freeing up your time to work on your business while your website is professionally cared for.

### With the Standard Managed Service Plan, you receive...

- A custom designed site that fits your business for no extra cost
- Your own dedicated Website Manager
- Monthly information updates including news updates, special offers, announcements, image updates or any other information updates.
- Search engine registration of your site for better search engine rankings.
- Training for you and your staff, so you can make updates like a pro too.
- You can make updates via the web with our easy to use design interface. Most actions are point and click.
- Local service via phone, email, or face to face
- Maintenance, support and renewal of domain names, local hosting and server facilities.

### Why choose MCS?

1. An easy way to update and manage your site: Just email us the changes you require!
2. We can work with an existing site or start from scratch and have you online in less than a month.
3. You have the option of updating the site yourself or have us take care of it. We become your personal web team that you can call whenever you need.
4. Guaranteed service levels: No long delays getting your changes online.
5. Professional service: We're here to make things easier for you.
